## **Functional Capacity Screens**

Congratulations on beginning the process of becoming a CHH employee!

For a moderately mobile and healthy candidate, the functional capacity screening you will undergo as part of the hiring process is typically quick and not too difficult. Here are some things to know before you visit the SMART Center for your screening:

- The purpose of this screen is to assess if you can physically perform the tasks of the job for which you are being hired.
- Please try to arrive five minutes early for your appointment.
- Wear loose, comfortable clothing – no heels please.
- There will be some minor physical exertion involved.

Again, congratulations on your path to a new opportunity here at Cabell. I look forward to helping you with this step of the process.

Sincerely,

Michael Bonar, PTA
